

Excursion in and around Fil'akovo

Who said that you can't live much in a short time?
If one is in the right place, anything is possible.

The Fil'akovo Castle Museum offers you an interesting and meaningful program.

Visit the Castle of the Fil'akovo, where you can learn about the exciting history of the castle, the typical weapons of the age and the interesting, heroic life of the captain of the castle, and also gain insight into the Turkish era.

The historical exhibition is complemented by interesting thematic exhibitions. After viewing the Castle Museum, you will be greeted by the lookout tower on the top of the Bebek Tower and a tour of the historic castle ruins. What's more, in May 2018, the institution opened an underground passage carved into the rock of Castle Hill on Podhradská street, which features an exhibition of locally-related memories of World War II. You can also visit the Municipal Museum, the Franciscan Church, the city park and the zoo.

For a historical overview of the area, the next stop might be the Somoskő castle on the Slovak-Hungarian border, with a "basalt organ" along the study path. The Novolandia Thermal Spa (Rapovce) with salt water awaits its guests.

**Please note that it is advisable to register in advance for group visits to the castle!
Further information is available at::**
